
Home Center 2

FIBARO SYSTEM

Your home, your imagination

What is Home Center 2 ?

Home Center 2 is an Award Winning* central unit of the smart home Fibaro system. The system is based on Z-wave technology using Fibaro micro modules and sensors which connect to an already existing electrical system within the home.

The flexibility of modules and sensors allows for complex controls of 100s of different scenarios for convenience, safety, and energy control, all with non-invasive installation.

Control of the system and all its functions is achieved with a very user-friendly interface on the computer or via smart phone/tablet application. The smart phone/tablet application can be used anywhere in the world with voice interface and GPS integration.

**Men's Stuff Europe awarded Fibaro "Best gadget of 2012"*

Distinctive features

- Based on a very stable Z-wave technology,
- Simple and non-invasive installation that does not damage the infrastructure,
- Remote access via web page or mobile phone,
- Voice control via app within home or remotely,
- [See "Lili I'm coming home" Video](#)
- Utilization of GPS on mobile device to interact/control certain functions and scenarios,
- Geo localization – tracking your family members,
- SMS notification,
- Advanced integration with Alarm & Fire system for intelligent safety response,
- Conditioning scenes depending on weather, or other user-defined variables,
- Extremely efficient hardware architecture = fastest device of its kind in the world,
- Manageable users' rights,
- Advanced recovery system.

Distinctive features coming soon

- Music integration/control with audio for emergency situations,
- Shopping with Fibaro,
- The Fibaro Services.

Technical Specification

Intel Atom 1.6Ghz Processor

Thanks to its efficiency, Home Center 2 is much faster than other Z-Wave gateways currently available in the world.

1GB RAM, 2GB SLC Hard Drive

Large memory + fast processor = quick communication between Fibaro System devices. Hardware architecture used in Home Center 2 makes Z-Wave based home automation system work much faster than ever.

4GB MLC Recovery Disc

Significantly improved user safety thanks to Fibar Group's own approach to data protection. Each Home Center 2 has its own recovery disc, holding system backup, unique to each gateway. This closes each system completely from unauthorized access. Another advantage of this solution is quick and simple system healing after any failure.

The looks

We have put huge emphasis on Home Center 2 looks. Unlike most similar devices, ours is made of solid aluminum which gives it an elegant, seamlessly design.

Home Center 2
FIBARO SYSTEM

Polski

Home Center 2 jest urządzeniem elektronicznym, używanym do sterowania i zarządzania Systemem Fibaro. Home Center 2 komunikuje się z elektronicznymi komponentami systemu Fibaro rozmieszczonymi w domu bądź mieszkaniu, używając protokołu radiowego Z-Wave. Pozostałe urządzenia Systemu Fibaro:
- Relay Switch 2x1,5kW,
- Relay Switch 1x1,5kW,
- Roller Shutter,
- Dimmer.
Więcej informacji uzyskasz na stronie internetowej www.fibaro.com bądź u autoryzowanego sprzedawcy w Twoim mieście.
Opakowanie zawiera:
- Home Center 2,
- zasilacz 230V,
- przewód sieciowy.
